

## WHO are we?

Since 1990, the Grandparents' Association of Québec is an organization that helps grandparents, families, grandchildren as well as elders. It also raises authority and public awareness about problems being encountered.

More and more families experience breakups and the non-custodial parent loses contact with his/her children. This is why the relationship between grandchildren and the grand-parents and the extended family is often broken.

When parents are unable to care for their children, the latter are entrusted to foster families chosen by the DYP without any regard to any emotional bonds and ties with their grandparents, uncles, aunts, etc. The possibility for the extended family to take over the responsibilities is ignored. Worst of all, according to the law, in cases of adoption, the biological grandparents no longer exist.

*For the love of our grandchildren !*

## Objectives

- ▶ To help grandparents and elders having difficulties in a family context.
- ▶ To offer phone line advice and reference services to grandparents.
- ▶ To develop and set up a help line and information network for grandparents and families to share their concerns as well as their life experiences in a climate of trust and respect.
- ▶ To reestablish and reinforce bonds between generations.
- ▶ To increase authority, media and public awareness of the real life problems grandparents and families go through.
- ▶ To promote the respect of family values and the history of family roots to enrich the development of the next generation.
- ▶ To bring together the grandparents and the people who share these concerns and the objectives of the Association.

## Québec Civil Code

### Article 611 :

« In no case may the father or mother, without a grave reason, interfere with personal relations between the child and his grandparents.

Failing agreement between the parties, the terms and conditions of these relations are decided by the court. »

### Article 33 :

« Every decision concerning a child shall be taken in light of the child's interests and the respect of his rights.

Consideration is given, in addition to the moral, intellectual, emotional and physical needs of the child, to the child's age, health, personality and family environment, and to the other aspects of his situation. »
